

IOWA

Department of Anthropology
2022-2023 Colloquium Series

“The Human Geography of Viruses”

Andrew Kitchen

Friday, February 24, 2023
2:30pm in 27 Macbride Hall

Dr. Kitchen is an anthropological geneticist with interests in human population history and the origins of human infectious disease. He uses an evolutionary perspective to investigate the processes that have produced observed, modern distributions of human genetic and pathogen/parasite diversity.

Individuals with disabilities are encouraged to attend all University of Iowa-sponsored events. If you are a person with a disability who requires a reasonable accommodation in order to participate in this program, please contact the Department of Anthropology in advance at 319-335-0523.
